Summary

Mindful and self-organised developer with a 8+ years experience in game development, from small and mobile to VR and PC.

I have gained a lot of valuable experience in my last projects, however, I'm looking for an opportunity to contribute these skills to a bigger and unique projects. I'm seeking fresh challenges and the possibility to develop further professionally.

Skills

Languages: C++, C, Objective-C, plus a bit of C#, Python, Swift

Game Engines: UE4, Cocos2d, a bit of Unity

Source Control: Git, Perforce, SVN, Mercurial

Achievements

- Participated in various projects with different pipelines and environments
- Optimised performance critical pieces of code
- Ported a lot of blueprints to C++
- Introduced code reviews and code style
- Mentored a junior developers

Career Summary

Game Developer, HYVRLabs

02.2017 – present

As a remote team member, I participated in development of VR multiplayer shooter for Steam.

https://store.steampowered.com/app/1135850/NearPrime_Net_Burn/

- converted project from BP to C++
- made performance and memory optimisations
- made systems for hit-scan weapons, VR player character and VR hands interactions
- developed system for AI characters (flexible behaviour setup, cover system, different classes)
- made few UI tasks
- during some period of time I held the position of lead programmer (that involved managing small art team and helping game designer to achieve his goals)
- made a several technical interviews to hire more people

Technologies: C++, UE4, Oculus Rift, VR, Perforce

Game Developer, self employed

11.2017 – 06.2018

Various projects with small tasks (bugs fixing, performance optimisations)

Technologies: UE4, C++, Oculus Rift, VR, Perforce, git

Game Developer, self employed

01.2016 – 05.2016

As a part of freelance team, I helped to develop quest game based on Russian comedy show

'Borodach' by Comedy Club Production. Appstore link: <https://apple.co/33iHDeM>

- iOS optimisations

Technologies: Unity, git

Game Developer, hippie games **01.2015 – 05.2017**
Indie startup with 4 friends, sci-fi RPG game with auto-generated and fully destructible locations, multiplayer and turn-based combat
- inventory system
- AI system (different game modes, weapons and difficulty levels)
- World lore, history, main characters background, intro video plot (collaboration with concept artist)
Technologies: UE4, C++, SVN

Game Developer, self employed **12.2013 – 11.2017**
Remote job for Lorenzo Carver (<https://www.linkedin.com/in/lorenzocarver>), development of various prototype applications to check 'gamification' approach, remote and on-site participating in different hackathons
- mobile arcade racing game with elements of social network (procedural 2D terrain generation and rendering)
- mobile game for business owners which can help to calculate and predict different parameters (LTM, NTM, cash flow)
- voice analysis application for caller to check in real-time voice pitch, voice timbre and words per minute (iOS and WatchOS)
Technologies: C++, Objective-C, swift, cocos2d, cocos2d-x, Box2d, WatchOS, UIKit, Xcode, git

Game/Tools developer, Lemon Tree studio **08.2011 – 12.2013**
Developed a variety of mobile games and applications for iOS and macOS platforms
- mentored a few interns during their study of cocos2d-x and Box2d
- participated in several technical interviews from the employer side
Technologies: C++, Objective-C, cocos2d, cocos2d-x, Box2d, Xcode, SVN, git

Programmer, Aspekt **08.2008 – 08.2011**
Production automation development and maintenance at the bakery plant
Technologies: 1C:Enterprise 8

Education

Master's Degree in science **2005 – 2011**
Omsk State University, Russia
Solid State Physics
